

Test Scenarios on Login and Logout Registration page:-

Scenario 1: Verify that the mobile number field accepts only 10 digits.

Scenario 2: Verify that entering less than 10 digits shows an error message indicating an invalid mobile number.

Scenario 3: Verify that entering more than 10 digits is restricted or shows an error message.

Scenario 4: Verify that only numeric input is accepted in the mobile number field.

Scenario 5: Verify that entering special characters or alphabets in the mobile number field is restricted or shows an error.

Scenario 6: Verify that the mobile number field is marked as required, and an error is displayed if the field is left empty.

Scenario 7: Verify that the error message appears if the "NEXT" button is clicked without entering a mobile number.

Scenario 8: Verify that clicking the "NEXT" button proceeds to the next step if a valid 10-digit mobile number is entered.

Scenario 9: Verify that clicking the "NEXT" button without entering a mobile number or with an invalid number does not proceed to the next step.

Scenario 10: Verify that an appropriate error message is displayed when an invalid mobile number is entered.

Scenario 11: Verify that the error message disappears once a valid mobile number is entered

Scenario 12: Verify that the page layout is responsive and displays correctly on different screen sizes (desktop, mobile, tablet).

Scenario 13: Verify that the "SIGN IN" and "NEXT" buttons are clearly visible and clickable.

Scenario 14: Verify that any input in the mobile number field is not visible in the URL or the page source to prevent leakage of user information.

Scenario 15: Verify that the mobile number input does not allow copy-pasting for security purposes (if applicable).
